Washington, DC 20554

Dear The Federal Communications Commission,

I oppose an increase in USF low-volume user fees. Federal Taxes and fees make up 40% of my current land-line phone bill with MCI. I understand there's a move afoot to increase the USF fund fees for low-volume residential and cell customers and decrease it for hi-volume big-business callers. This is unfair, and I urge you to support and adopt the "Fair Share Plan" as a solution to current concerns with the Universal Service Fund (USF).

Sincerely, Paul Little

Sincerely,

Paul Little
